WHY MULTIPOINT?

Multipoint locking systems secure a door at several points along the frame with a single turn of the handle or key. This distributes locking force evenly from top to bottom, improving security, reducing door flex, and creating a tighter seal against air, water, and noise. They are used on all Unitech fiberglass high-performance entry doors where strength, durability, and precision fit are essential.

THE AUTOMATIC **TEDEE LOCK**

tedee Enable new ways to enter, protect, and share your place. The smart lock and your smartphone are all you need to get started.
